

TOOLS FOR SCHOOLS

March 2011

Did you know...that stuffed animals are not permitted in the Westport Public Schools? Stuffed animals collect dust, harbor dust mites and animal dander and are generally difficult to properly clean. This can be particularly troublesome for those students that have allergies and asthma. As an additional caution, they may also create the opportunity for the transmission of germs and head lice. See the most up to date *IAQ Control and Improvement Procedures* (December 15, 2010 pages 7-12) for further details. The procedures are available on the district website at www.westport.k12.ct.us or in your school's TFS binder.
